Changes in the Principal Degree and Certification Plans

The 36 hour master’s degree with specialization in School Administration is undergoing a change in course offerings and structure. The standard principal certification plan is going from a 45 hour program to a 39 hour offering.

Both of these modifications go into effect with the Spring 2006 semester for new students into the principal program.

Students who are currently in the EDAD principal program will be able to consider remaining with their present plans or changing to the new plans effective June 1, 2006. If you are interested in looking into the possibility of changing your plans, first talk with your academic advisor. Then if you wish to pursue the new plans complete the Change of Plan form and give it to your advisor. The form is available on the table outside of Education Department Office, Room 305 in the Morelock Academic Building or at the link provided below. Any questions should be directed to your academic advisor.
